

THE WOODEN HUT GIFT COMPANY - SHIPPING OPTIONS

HOW WE CALCULATE YOUR SHIPPING CHARGES

We calculate your shipping charges based on the combined weight of your item(s).

The weight rate table is a progressive scale based on the total weight of all items in the shopping cart and increases in increments when a specific weight is reached.

We consider this approach offers our customers the cheapest options rather than applying flat rate charges which can result in disproportionate costs for some packages.

SHIPPING METHODS THAT WE USE

In the UK we ship predominately with the Royal Mail and Parcel Force. For the rest of the world we use Parcel Force.*

All items are despatched with tracking details that are available upon request.

EXAMPLE

WEIGHT FROM...	...TO KG'S	COST
0.00	0.25	£3.97
0.25	0.50	£4.84

*We do reserve the right to change the advertised shipping service for any item and or location. These changes will be made for logistic purposes and will be a like for like service i.e. if a proof of delivery or tracking options are stated on the original service they will be on the amended service.
